

CofC Account Set Up

We will be using cofc.edu student web accounts for sections using PHP as support is built in. You should have established a student web account in the prerequisite class CSCI-115 - Website Design.

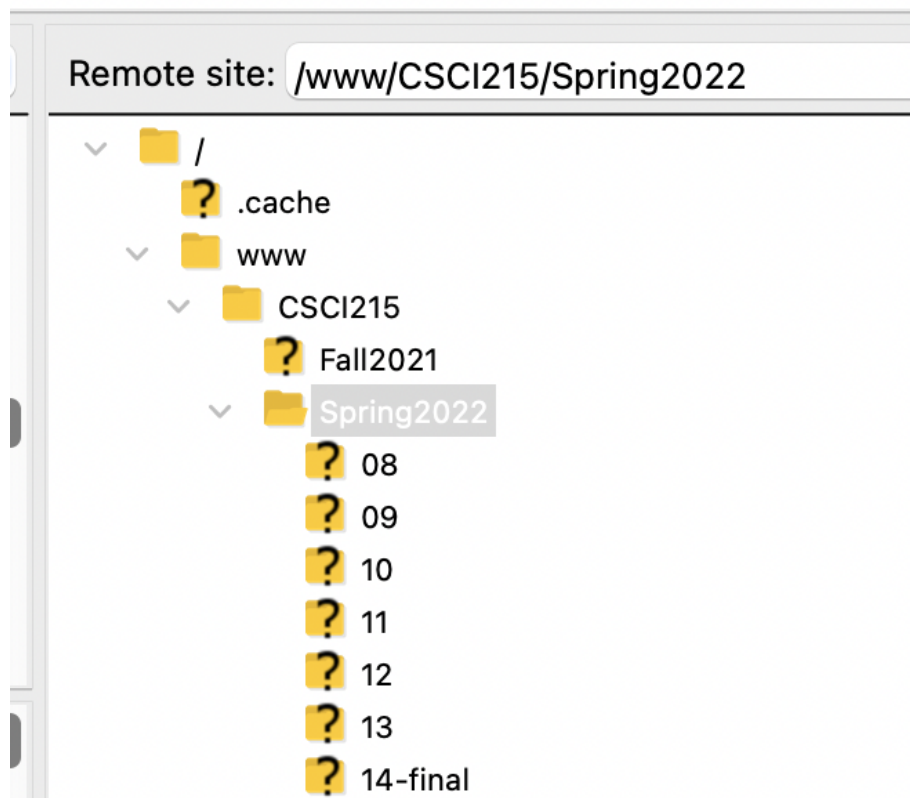

1. See the following for basic info: <http://stu.cofc.edu/index.php>
2. For instructions on how to use, see: <http://stu.cofc.edu/howto.php>

Set Up for CSCI215

Once you have confirmed access to your student web account, create the following directories for class files related PHP and remaining sections in this class.

```
/
+ www/
  + CSCI215/
    + Spring2022/
      + 08/
      + 09/
      + 10/
      + 11/
      + 12/
      + 13/
      + 14-final/
```

and here's a image from FileZilla

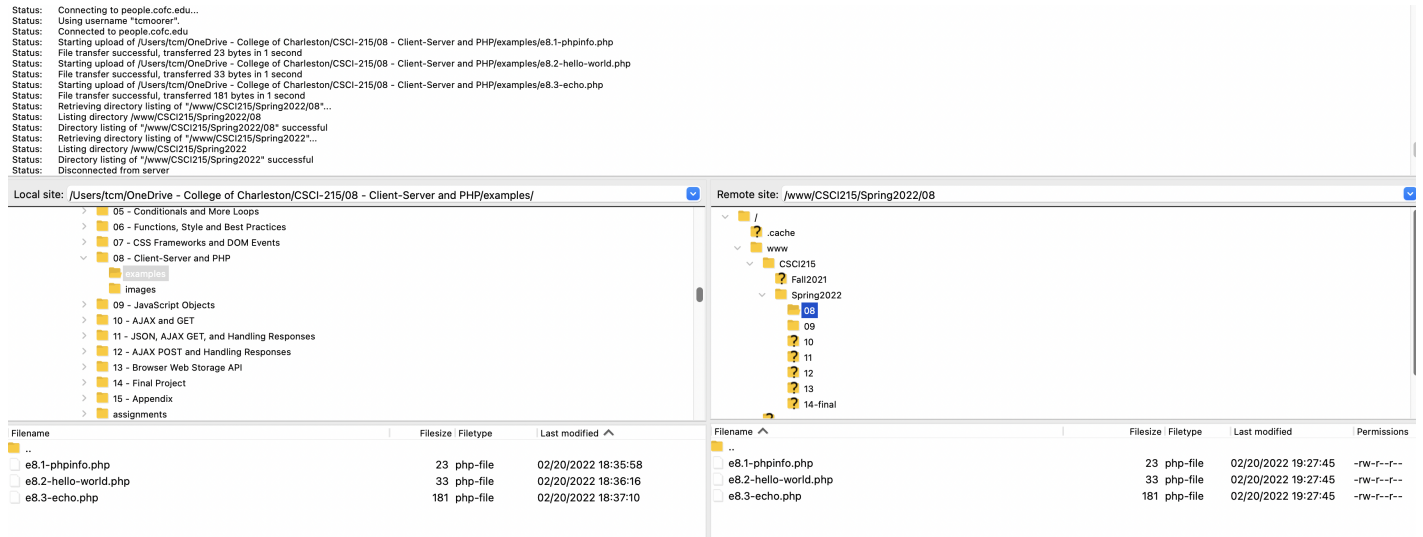

Upload Examples and Access Files in Browser

Now that the class directories are created, upload the 3 example files under Section 8 - Client-Server and PHP:

- e8.1-phpinfo.php
- e8.2-hello-world.php

- e8.3-echo.php

The following screenshot shows the files copied into the 08 directory.

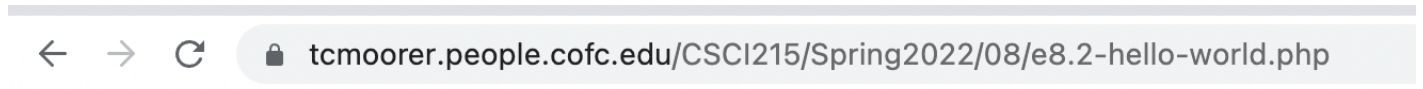

In order to access the files, one way is to use a browser.

For my account, for example:

<https://tcmoorer.people.cofc.edu/CSCI215/Spring2022/08/e8.2-hello-world.php>

Accessing this in the browser will result in

Hello World!

Your student account will have the following pattern:

[https://\[username\].stu.cofc.edu/CSCI215/Spring2022/08/e8.1-phpinfo.php](https://[username].stu.cofc.edu/CSCI215/Spring2022/08/e8.1-phpinfo.php) [https://\[username\].stu.cofc.edu/CSCI215/Spring2022/08/e8.2-hello-world.php](https://[username].stu.cofc.edu/CSCI215/Spring2022/08/e8.2-hello-world.php)
[https://\[username\].stu.cofc.edu/CSCI215/Spring2022/08/e8.3-echo.php](https://[username].stu.cofc.edu/CSCI215/Spring2022/08/e8.3-echo.php)
